**My New Energy Bill**
After 2 or 3 billing cycles, you will begin to see the difference! Keep track of it below:

- **Date:**
- **Electric Bill:**
- **Gas Bill:**
- **Water Bill:**

**HOME ENERGY SAVER CHECKLIST**

- Caulk and seal places where air can leak through, like electrical sockets and vents.
- Weatherstrip your windows and doors.
- Insulate your attic, walls and floors.
- Install dual pane windows.
- Insulate your water heater and pipes.

- Replace light bulbs with energy efficient CFL Energy Star bulbs.
- Replace old appliances with energy efficient ones.
- Avoid using large appliances like washers and dryers during peak hours.
- Some appliances use energy. If they are turned off and plugged in. If you’re not using it, unplug it!
- Install solar panels. We get plenty of sun in Southern California. Use it!

- Water your garden during dusk. During the day, most of the water evaporates.
- Replace plants with native plants. They need less water and are beautiful.
- Fix leaky faucets.
- Replace your toilet & showerhead with more efficient ones.
- Install a rain barrel. You’ll be surprised at how much water your gutter catches from your roof.
- Install a gray water system. It waters your plants using water from your bath and sink.
